

Application 21 October 2016: Dad's application to live with the child, who was 15, and to prohibit mum from removing the child to Australia. No safeguarding concerns but the child had recently been taken to Australia for four months without a long-term visa and had not been in education since May.

The subject child had a younger half-sibling. This child's dad (dad 2) also made an application to spend time with the child (child 2), and to prevent relocation. Further, mum made an application for permission to remove the children from the jurisdiction. All three applications were combined at the FHDRA.
